1. The following is an examiner's statement of reasons for allowance: None of the prior art whether taken singly or in combination discloses the claimed invention. Specially, independent claim 1 distinguishes over the prior art in that it requires obtaining a distinct color mean value in each of the first, second, third and forth interpolation process. Independent claim 25 distinguishes over the prior art in that it requires a unique combination of the computation of common parameters, the computation module of horizontal differential and vertical differential, the computation module of average, the computation module of edge weighting, and the selective module of interpolation. The most relevant prior art found are Wang, Lin, Adam, Jr. et al, and Chang et al. These references disclose various color interpolation techniques, but fail to teach the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phuoc Tran whose telephone number is (703) 305-4861. The examiner can normally be reached on MON-FRI.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Leo H Boudreau can be reached on (703) 305-4760. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
